ABOUT ME

Full-stack developer experienced in building scalable web applications and modern web platforms. Skilled in frontend development using React, Next.js, JavaScript, and TypeScript, with backend systems built on Node.js, Express, and REST/GraphQL APIs. Experienced in integrating Generative AI capabilities into applications to enhance functionality and user experience. Comfortable working across the full development lifecycle and deploying applications using containerized environments such as Docker and Kubernetes. Focused on writing clean, maintainable code and building reliable production systems.

TECHNICAL SKILLS

- **Languages :** JavaScript (ES6+)
- **Frontend :** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Context API, Redux Toolkit
- **Backend :** Node.js, Express.js, REST APIs, JWT, OAuth, GenAI APIs
- **Database :** MongoDB, Mongoose, Aggregation, Indexing, localStorage
- **Tools :** Git, GitHub, Postman, Vercel ,Render

EDUCATION

J.D.S.V.M Passout: 2022
High School (12th) | Percentage : 77%

Dr. AITD, Kanpur September 2024 - Present
B.Tech in Information Technology | SGPA : 7.8

PROJECTS

Emotion Based Music Recommendation System [Live Preview]
Built a full-stack web application that detects user facial expressions in real time and plays songs based on detected emotions.

- Developed the frontend using **React** to capture live webcam input and provide an interactive UI.
- Integrated **Google MediaPipe** for real-time facial expression detection and emotion recognition.
- Built backend services using **Node.js and Express** to process emotion data and fetch appropriate songs.
- Used **MongoDB** to store song metadata and emotion-based mappings for recommendations.
- Implemented a full **MERN stack architecture** to handle real-time interaction between the client, server, and database.
- Implemented **user authentication with login and signup functionality** to manage user access and sessions.

Web-Based OS Portfolio [Live Preview]
Interactive portfolio designed as a browser-based desktop environment.

- Built a desktop-style interface using **React**, simulating an operating system experience within the browser.
- Implemented window management features such as draggable, resizable, and multi-window applications.
- Designed modular components to represent different applications like projects, about section, and contact interface.
- Focused on responsive UI and smooth user interactions to create an engaging portfolio experience.

CERTIFICATIONS

- Certificate of Completion –Cohort 2.0 Full Stack Web Developer with Gen AI (Sheryians Coding School)
- Prompt Engineering with GitHub Copilot - SkillUp
